

Acadia National Park Vegetation Map Class for Conifer Swamp Woodland (white cedar phase)

The map class "[Conifer Swamp Woodland \(white cedar phase\)](#)" is composed of the following vegetation associations, each described separately:

- [Northern White-cedar Wooded Fen](#)
- [Black Spruce Woodland Bog](#)

The Conifer Swamp Woodland (white cedar phase) map class (WCS) is a broad map class encompassing several variations of conifer swamps. It is considered one of two map phases of the Wooded Conifer Wetlands. WCS is dominated by white cedar, sometimes mixed with black spruce and/or tamarack, birch, and red maple. Canopy cover is variable, from about 25%- to full cover.
